HELEN HUNT MEDICAL AESTHETICS

What is *Hyaluxelle?*

Hyaluxelle® is a completely hormone-free injectable treatment designed to restore the health, hydration and elasticity of the delicate tissues in the intimate area.

Created by IBSA, the pharmaceutical team behind Profhilo®, it applies the same principles of cellular bio-remodelling to intimate wellness.

Rather than adding volume like a traditional dermal filler, it flows smoothly through the tissue layers to deeply hydrate thinning, dry or irritated tissue, and stimulate your body's own collagen and elastin.

"Changes in intimate wellness are very common, after childbirth, during menopause or with other hormonal shifts. You don't have to simply live with them."

02 · WHAT IT CAN HELP WITH

- Vaginal dryness, irritation or tightness
- Non-infectious burning, stinging or itching
- Discomfort or pain during intercourse (dyspareunia)
- Loss of elasticity and thinning of the vulval tissues

HELEN HUNT MEDICAL AESTHETICS

Thoughtful care, *lasting comfort*

01
Hormone-free
Contains no oestrogen or other hormones, an option for women who cannot use, or prefer to avoid, HRT.

02
Works alongside HRT
Can be used together with standard HRT or local vaginal oestrogen for more complete relief.

03
Longer-lasting relief
Unlike daily creams, gels or moisturisers, it works at a deeper level to provide sustained comfort.

04
Highly biocompatible
An ultra-pure form of hyaluronic acid, a moisturising molecule found naturally in your body.

20–30	2	6–12	Minimal
MINUTE TREATMENT	SESSIONS 30 DAYS APART	MONTHS BETWEEN TOP-UPS	DOWNTIME

04 · YOUR TREATMENT JOURNEY

FIRST
Consultation
A private, unhurried conversation about your symptoms, history and goals.

TREATMENT DAY
Treatment
Numbing cream for 20–30 minutes, then fine micro-injections around the vaginal entrance (vulvar vestibule).

30 DAYS LATER
Second session
Hydration often improves within weeks; full benefits develop after this session.

EVERY 6–12 MONTHS
Maintenance
A single top-up treatment helps keep symptoms at bay.

05 · AFTERCARE & RECOVERY

Back to your day, *gently*

There is virtually no downtime, and most daily routines can be resumed straight away.

WHAT TO EXPECT

Mild redness, slight bleeding, minor swelling or small bruises at the injection sites, usually settling on their own within a couple of days.

FOR 48–72 HOURS

Please avoid sexual activity, tampons, swimming, hot baths and strenuous exercise to allow the tissues to heal.

Begin with a *conversation*

Every treatment starts with a private consultation with one of our medical practitioners, where we will discuss your symptoms and whether Hyaluxelle® is right for you.
