A PATIENT GUIDE · ULTRACLEAR®

Introducing *UltraClear®*

The world's first cold fibre laser,
now at Helen Hunt Medical Aesthetics

Refresh · Renew

Be natural. Be beautiful. Be you.

AVAILABLE AT OUR EXETER CLINIC

WELCOME

HELEN HUNT MEDICAL AESTHETICS

A new chapter in *skin rejuvenation*

We're delighted to bring UltraClear® to our Exeter clinic. It's one of the most advanced laser resurfacing technologies available today, and it was named Best Laser Treatment for All Skin Tones in the NewBeauty Awards 2023 and 2024.

Traditional resurfacing lasers rely on heat. UltraClear® is different. Its cold fibre laser renews the skin with far less heat, so treatments are typically more comfortable, healing is quicker, and it's suitable for every skin type.

We offer two UltraClear® treatments, tailored to your skin, your goals and how much downtime suits you. Have a look through, and if you have any questions at all, we'd love to hear from you.

Comfort without compromise
Far less heat, for a more comfortable treatment.

For every skin tone
Safe for all skin types, from very fair to deeper skin.

Tailored to you
From a quick refresh to deeper renewal.

The Helen Hunt Medical Aesthetics team

THE TECHNOLOGY

Why UltraClear® *is different*

01
Cold, not hot
Less heat means less discomfort and a lower risk of heat damage.

02
Every skin tone
Designed to treat lighter and deeper skin types safely.

03
Quick treatments
Most areas take just 10–20 minutes.

04
Faster healing
Recovery is typically quicker than with traditional resurfacing lasers.

NEWBEAUTY AWARDS 2023 & 2024

Best Laser Treatment for All Skin Tones

WHAT ULTRACLEAR® CAN HELP WITH

- Sun damage & age spots
- Fine lines & wrinkles
- Lines around the mouth
- Acne scars & other scars
- Uneven texture & pores
- Dull, tired-looking skin
- Uneven skin tone
- Neck, chest & hands

TWO TREATMENTS, ONE LASER

Your practitioner can use one treatment, or combine both in a single appointment for a treatment that's truly personal to you. Turn the page to meet them.

LEVEL ONE · REFRESH

HELEN HUNT MEDICAL AESTHETICS

3DMIRACL®

The glow-giving skin refresh

A gentle surface treatment to brighten dull skin, even out tone and soften early sun damage. It's quick and comfortable, usually needs no numbing cream, and most people head straight back to their day.

TREATMENT TIME	DOWNTIME	IDEAL FOR
Around 10–20 minutes	Minimal, usually a little pinkness for a day or two	Glow, tone, texture and early sun damage

Images courtesy of Acclaro Medical and UltraClear® providers. Individual results vary.

HELEN HUNT MEDICAL AESTHETICS

UltraClear®

Deeper renewal for lines, spots and scars

Works deeper in the skin to target age spots, fine lines, uneven texture and acne scarring, while encouraging fresh collagen.

TREATMENT TIME	DOWNTIME	IDEAL FOR
Around 10–20 minutes per area	3–5 days, with make-up usually from day 4 or 5	Sun damage, fine lines, texture and acne scars

Images courtesy of Acclaro Medical and UltraClear® providers. Individual results vary.

HELEN HUNT MEDICAL AESTHETICS

Which treatment *is right for me?*

Both treatments use the same cold fibre laser. The difference is how deeply it works, and how much downtime you'd like to allow.

	3DMIRACL®	UltraClear®
LEVEL	One · Refresh	Two · Renew
WORKS ON	The surface of the skin	Deeper in the skin, encouraging fresh collagen
IDEAL FOR	Glow, tone, texture and early sun damage	Sun damage, fine lines, texture and acne scars
TREATMENT TIME	Around 10–20 minutes	Around 10–20 minutes per area
COMFORT	Usually no numbing cream needed	Numbing cream keeps you comfortable
DOWNTIME	Minimal, usually a little pinkness for a day or two	3–5 days, with make-up usually from day 4 or 5

The best of both

Your practitioner can combine both treatments in a single appointment, for a plan that's truly personal to your skin.

Not sure which is right for you? That's exactly what your consultation is for. We'll look at your skin, talk through your goals and recommend the right treatment, or combination, for you.

HELEN HUNT MEDICAL AESTHETICS

Your questions *answered*

Does it hurt?

UltraClear® is known for its comfort. 3DMIRACL® usually needs no numbing cream at all, and for deeper treatments a numbing cream keeps you comfortable. Afterwards, your skin may feel warm, like mild sunburn.

Is it suitable for my skin tone?

Yes. UltraClear® is designed for all skin types, including deeper skin tones, which many traditional lasers can't safely treat.

How many treatments will I need?

Many people see a difference after just one treatment. Your practitioner may recommend a short course, depending on the treatment and your goals. As fresh collagen builds over the following months, your skin continues to improve.

How do I get started?

Everything starts with a consultation. We'll look at your skin, talk through what you'd like to achieve, and recommend the right UltraClear® treatment for you.

YOUR ULTRACLEAR® JOURNEY

01
Consultation
We assess your skin and listen to what you'd like to achieve.

02
Your plan
We recommend the right treatment, or combination, for you.

03
Treatment
Relax in expert hands, with clear aftercare to follow.
